Date: 03.10.2020

To
The Director,
National Highway Projects Authority,
Vijayawada.

Sir,

Sub: NH 16 – Road widening near Chinoutpally – space left for additional lane between the compound wall of Dr.Pinnamaneni Siddhartha Institute of Medical Sciences & Research Foundation and drainage of NH-16 - Development of green belt – request for permission – reg.

& & &

With reference to the above subject, this is to bring to your notice that the National Highway Projects Authority has left some vacant space for future development of additional lane between our college compound wall and the drainage of NH-16 near chinoutpally.

If the space is left like that the road side hawkers may occupy the area and set up their business establishments. In view of the above, we propose to develop and maintain green belt at our cost in that area with avenue plantation as per your guidelines, till you require that area for future development of additional lane.

We request you to accord approval for the above proposal at the earliest.

Thanking you,

Yours faithfully,

(Dr.P.S.N.Murthy)

To
The Regional Officer,
National Highway Projects Authority,
Vijayawada.

Sir,

Sub: NH 16 -Chinoutpally -Dr. Pinnamaneni Siddhartha Institute of Medical Sciences & Research Foundation - request for foot over bridge - reg.

& & &

With reference to the above subject, this is to bring to your kind notice that our Medical College is on NH - 16 near chinoutpally. About 750 MBBS students, 150 house surgeons and 300 Post graduate medical students study in our institution. About 225 teaching faculty and 433 non-teaching staff work in the campus.

Most of the students and non-teaching staff come from Vijayawada daily using public transport. They get down the bus on the western side of the highway in front of college gate, cross the highway to enter the campus.

After widening of the NH -- 16 as 4 lane highway, it is not possible for our students & staff to cross the road to enter our college.

Similarly a large number patients who come by bus from different villages, who get down the buses on the western side of the road are also finding it difficult to cross the highway and enter our hospital.

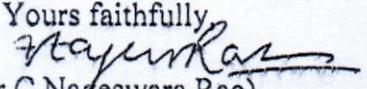

Around 1200 patients come to our hospital daily and 400 patients come to our dental college daily. Our hospital is a 900 bedded hospital and around 500 inpatients will be there in the hospital during all days. A number of visitors for the inpatients will also be coming to the hospital daily.

We have a residential area for our faculty and non teaching staff having 168 quarters and 232 student hostel rooms housing nearly 1000 individuals.

It will be convenient for all the above to come to hospital if a foot over bridge is arranged.

In view of the above we request you kindly consider and provide a foot over bridge on NH - 16 in front of our college main gate.

Thanking you,

Yours faithfully,

(Dr.C.Nageswara Rao)
Director General

& & &

With reference to the above subject, this is to bring to your notice that the National Highway Projects Authority has left some vacant space for future development of additional lane between our college compound wall and the drainage of NH-16 near chinoutpally.

If the space is left like that the road side hawkers may occupy the area and set up their shops. It will be difficult to control the waste and to maintain cleanliness. They also block the entrance of the entry of the hospital. In view of the above, we propose to develop and maintain green belt at our cost in that area with avenue plantation as per your guidelines.

We request you to accord approval for the above proposal at the earliest.

Thanking you,
